

Centralised. Accessible. Controlled.

Gain complete control over your risk frameworks with our easy to use, centralised and automated cloud-based solution.

More than just a Risk Management system

ViClarity provides a complete Risk Management solution that enables organisations to effectively Identify, Monitor, Score and Report on risk. Our process is used daily by clients and as a result, has been subject to thousands of successful regulatory inspections to date.

The ViClarity solution comes with pre-populated risks and controls that can be fully configured to suit your organisations needs. The platform also has the ability to take your current risk frameworks and build your process into our platform.

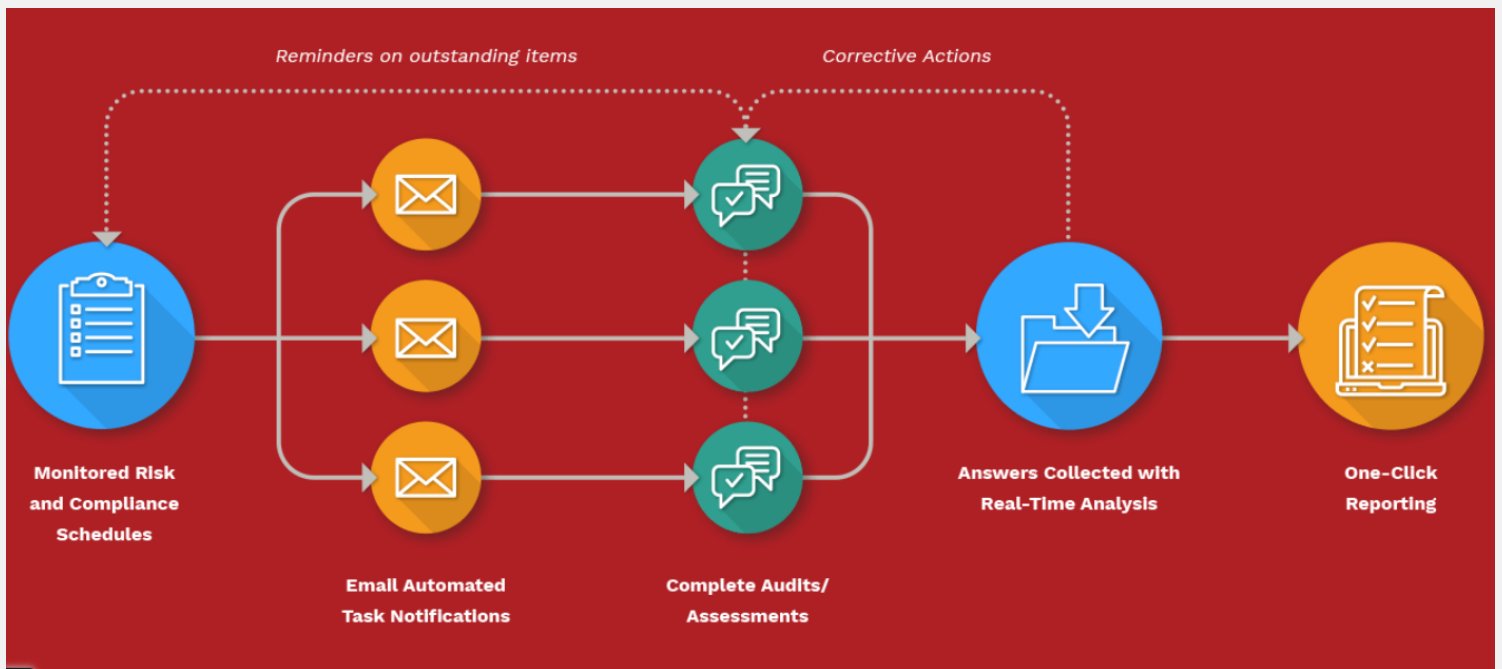

Developed with client needs in mind

All elements of the risk process are automated, allowing clients to spend less time chasing data and more time analysing it. Automation ensures risks, controls and reports are completed in a timely manner without hundreds of hours being wasted on administrative activity.

Main Features

- ✓ **Automatic Alerts** - Preschedule your full vendor program for months in advance. The system sends automatic alerts to audit owners when work is due and follows up until tasks are completed.
- ✓ **Real-Time Dashboards** Information is gathered in real-time and presented on live color-coded (RAG) dashboards allowing you to see results across levels of the organisation.
- ✓ **Evidence Gathering** Collect and store the correct evidence required for management. Intelligent workflow allows organisations to gather the required evidence and store it in a central location for easy access for reporting to management.
- ✓ **Inbuilt Corrective Action Tracker** Any areas of non-compliance or high risk can be managed on ViClarity's corrective and preventative actions feature. This allows for corrective actions to be created, tracked, and managed until completed.
- ✓ **Trend Reporting & Analysis** Results are collated automatically, and trends can be identified in real-time on a dashboard, allowing for efficient identification of required actions.

The Process Of Managing Risk Has Never Been So Easy

What To Expect From A ViClarity Implementation

Not only is ViClarity one of the most user-friendly platforms on the market, our ongoing support and customer success functions are what sets us apart from our competitors.

ViClarity provide each client with a **dedicated Project Team** that lead the implementation of the platform. This team provides expert feedback during the process and enable the clients to smoothly roll out the system across their organisation with little impact on client resources.

After a successful implementation, our **Customer Success Team** are available throughout the partnership to ensure clients are getting the most out of the system along with updating them on industry trends.
