

Automate. Evidence. Report.

Move away from time-consuming compliance processes through automation. See results in real time across all locations and departments.

Move away from time consuming manual audit tools

Organisations of all sizes are often too reliant on paper and spreadsheet based compliance processes. Keeping up to date with compliance requirements through manual auditing can be a time-consuming challenge.

ViClarity's Compliance solution, automates the audit process and presents results centrally in real time dashboards, allowing administrators to see all areas of non-compliance, action plans and evidence in one central location.

Becoming inspection ready with ViClarity's Compliance software

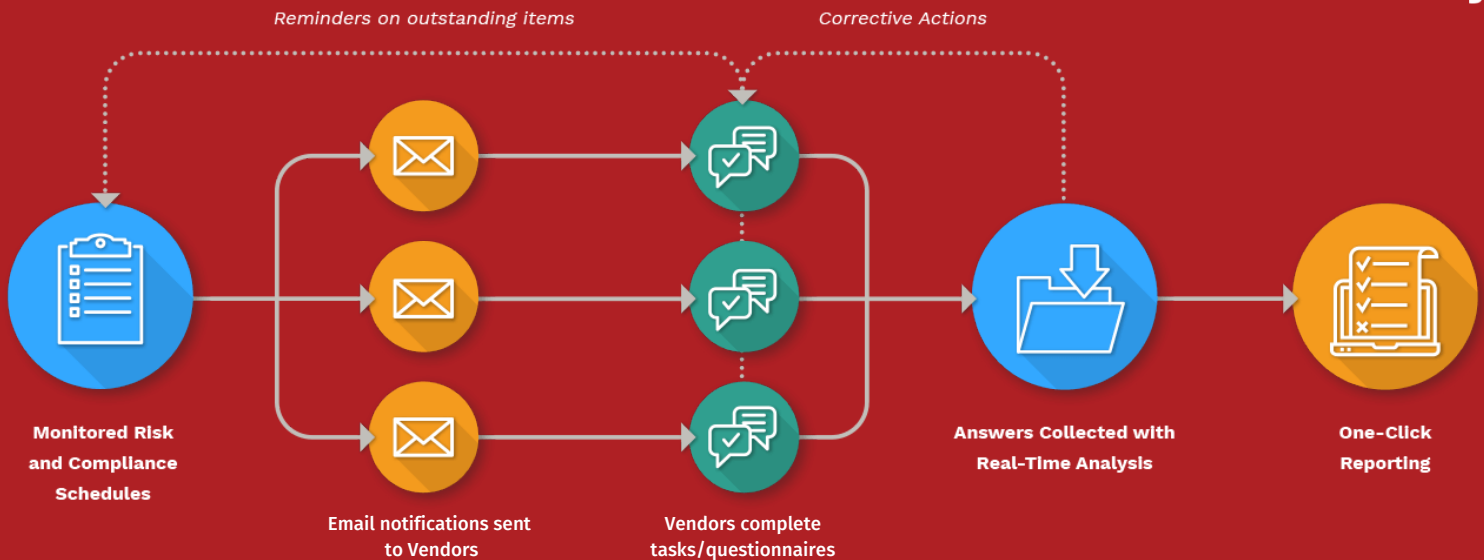

ViClarity's Compliance solution has been tried and tested across numerous countries to date and aligns to regulatory expectations. By having all data and corrective actions in a single solution, creating reports for the executive team as well as regulators can be done in a few simple clicks.

Main Features

- ✓ **Automatic Alerts** - Pre-schedule your full vendor program for months in advance. The system sends automatic alerts to audit owners when work is due and follows up until tasks are completed.
- ✓ **Real-Time Dashboards** Information is gathered in real-time and presented on live color-coded (RAG) dashboards allowing you to see results across levels of the organisation.
- ✓ **Evidence Gathering** Collect and store the correct evidence required for management. Intelligent workflow allows organisations to gather the required evidence and store it in a central location for easy access for reporting to management.
- ✓ **Inbuilt Corrective Action Tracker** Any areas of non-compliance or high risk can be managed on ViClarity's corrective and preventative actions feature. This allows for corrective actions to be created, tracked, and managed until completed.
- ✓ **Trend Reporting & Analysis** Results are collated automatically, and trends can be identified in real-time on a dashboard, allowing for efficient identification of required actions.

The Process Of Managing Compliance Has Never Been So Easy

ViClarity

What To Expect From our Implementation Process

Not only is ViClarity one of the most user-friendly platforms on the market, but our ongoing support and customer success functions are also what sets us apart from our competitors.

ViClarity provides each client with a **dedicated Project Team** that leads the implementation of the platform. This team provides expert feedback during the process and enables the clients to smoothly roll out the system across their organization with little impact on their internal resources.

After a successful implementation, **our Customer Success Team** is available throughout the partnership to ensure clients are getting the most out of the system along with updating them on industry trends.
