## Vendor Management Solution

# Automate. Evidence. Report.

Stay on top of all your vendor management requirements. See results in real-time across all locations and departments.

## Our Vendor Management Solution

Our software solution allows you to have all your vendors, contracts, and reviews in one central location eliminating duplicate records and driving service excellence. Prompted critical vendor reviews, due diligence checks and an automated vendor workflow ensures smarter decision making, reduce costs, and improve operational efficiency.

This Solution will satisfy your auditors and ensure complete compliance with regulators such as FCA, CBI, and others.

## Management and monitoring of Vendor Relationships

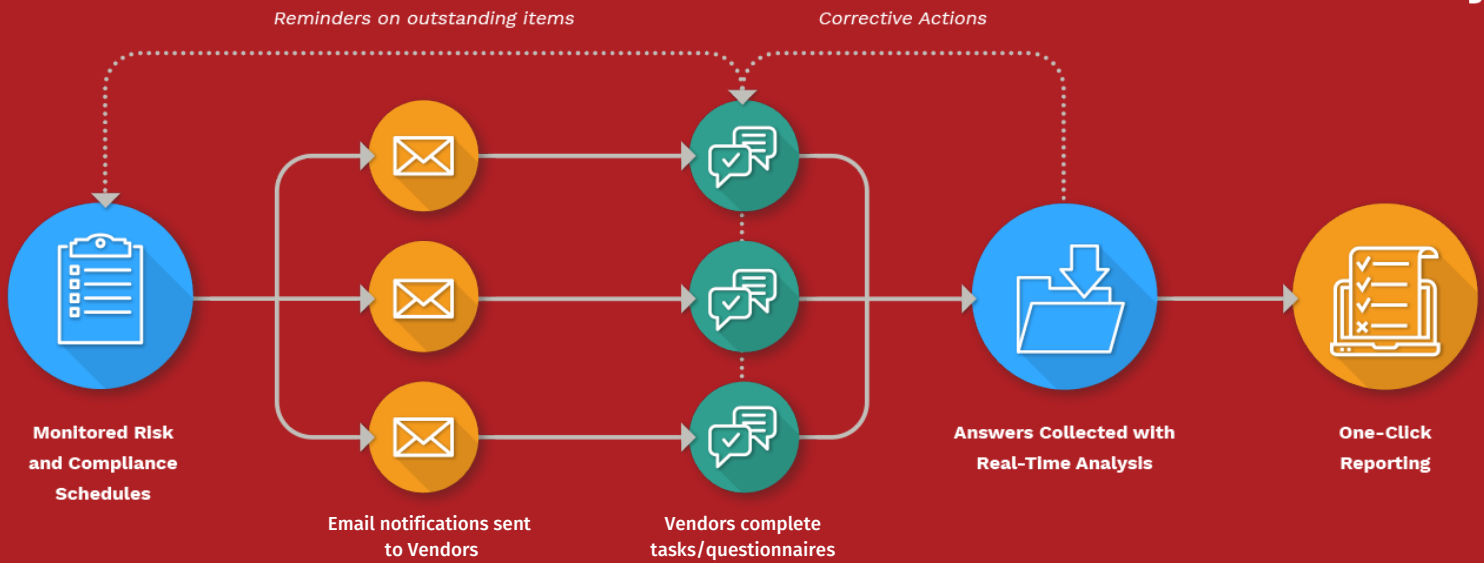

Appropriate vendor relationship management is crucial to the safety and effectiveness of your organization. A streamlined vendor management workflow allows you to assign responsibility and easily categorize your vendors i.e. critical, and noncritical. We understand the need for accountability in your organization. This Vendor Management system allows you to proactively deal with upcoming deadlines, identify areas where further action is needed, control costs, mitigate risks, and improve service.

## Main Features

- ✓ **Automatic Alerts** - Preschedule your full vendor program for months in advance. The system sends automatic alerts to audit owners when work is due and follows up until tasks are completed.
- ✓ **Real-Time Dashboards** Information is gathered in real-time and presented on live color-coded (RAG) dashboards allowing you to see results across levels of the organisation.
- ✓ **Evidence Gathering** Collect and store the correct evidence required for management. Intelligent workflow allows organisations to gather the required evidence and store it in a central location for easy access for reporting to management.
- ✓ **Inbuilt Corrective Action Tracker** Any areas of non-compliance or high risk can be managed on ViClarity's corrective and preventative actions feature. This allows for corrective actions to be created, tracked, and managed until completed.
- ✓ **Trend Reporting & Analysis** Results are collated automatically, and trends can be identified in real-time on a dashboard, allowing for efficient identification of required actions.

# The Process Of Vendor Management Has Never Been So Easy

ViClarity

## What To Expect From our Implementation Process

Not only is ViClarity one of the most user-friendly platforms on the market, but our ongoing support and customer success functions are also what sets us apart from our competitors.

ViClarity provides each client with a **dedicated Project Team** that leads the implementation of the platform. This team provides expert feedback during the process and enables the clients to smoothly roll out the system across their organization with little impact on their internal resources.

After a successful implementation, **our Customer Success Team** is available throughout the partnership to ensure clients are getting the most out of the system along with updating them on industry trends.
