ViClarity®

Cloud-Based Solutions

*Delivering real-time views of risk
and compliance for insurance companies*

Risk Management

Our integrated risk management solution enables insurance organizations to automate all components of their risk framework, including:

- Risk registers
- Risk controls
- Key risk indicators
- Risk events

Document Management

Policies change. Contracts are rewritten. Documents are being revised constantly. Stay on top of every change with ViClarity's centralized and automated document management solution with features including:

- Document Control Table
- Bulk Document Uploader
- Automated Document Numbering
- Check-In & Check-Out

Vendor Management

When you engage with an external vendor, it can introduce new or increased risk to your organization. Our vendor management solution will help you identify, assess, measure, monitor and control those risks. This solution includes:

- Automation of vendor due diligence tasks
- Contract and document storage

Compliance Management

Our compliance management solution allows compliance teams to easily manage all of their compliance obligations in one centralized place. This solution includes:

- Automation of compliance tasks
- Real-time reporting
- Easy-to-read dashboards for oversight

Complaint Management

Save time by automating complaint management for your organization. With our complaint management solution, you can increase the speed of logging, reviewing and resolving complaints. This solution includes:

- Automated complaint management
- Real-time dashboards to monitor progress
- Corrective action assignment and tracking

Board Management

Our board management solution offers the perfect place for collaboration. This solution includes:

- Board meeting prep
- Documentation storage and sharing
- Collaboration on materials
- Meeting minutes and follow up action tracking

In addition to these solutions, ViClarity offers customized solutions for internal audit and more. Please contact us to learn more about customized solutions.
